V Legatia

Stage
VI Legatia
SE

Legatia is Hybrid Audio's original product offered starting in 2006, and competition-proven worldwide. Legatia products are sold in *a la carte* speaker pairs or as component sets, allowing the end-user to design a custom "bespoke" system of Legatia products, or a combination of Legatia and other Hybrid Audio Technologies product offerings. A multitude of possible two-, three-, and four-way systems can be assembled using Legatia products. Legatia has one tweeter offering, two wide-bandwidth full-range midrange drivers and two wide-bandwidth midrange/midbass offerings.

Legatia SE is a collection of seriously enhanced drivers for the pinnacle of sound reproduction, and the yardstick by which other brands are compared. Legatia SE and Pro is the enduring brand of choice for critical audiophiles, world championship car audio competitors, or for those that require the very best in audio loudspeakers. The SE series midranges and midbass utilize the same mounting topology as the Stage V Legatia products for immediate upgrade potential, and offer two tweeter offerings, two wide-bandwidth full-range midrange drivers and two wide-bandwidth midrange/midbass offerings.

Mirus

Imagine

Unity

Clarus

Mirus is Latin for “astonishing” and is loosely termed our “entry-level” speaker system, for at the price point of Mirus, nothing else compares for accurate sound reproduction. Mirus speaker systems out-perform similarly-priced competitor’s products both in sound quality, spectral balance, and faithful reproduction of the musical source.

Kits include two-way coaxials with proprietary water-proof paper cones with swiveling soft-dome tweeters and integrated tweeter crossover. Grilles are optional.

(4”, 5 1/4”, 6 1/2”, 5x7” & 6x9” coaxial offerings)

Imagine is a favorite because of its price to performance ratio, and easily out-performs competitor speaker systems costing twice to three times the price. Imagine is designed for those interested in more than just an ‘OEM replacement speaker.’ (5 1/4”, 6 1/2” & 6x9” convertible coaxial/component set offerings)

Imagine subwoofers are the ideal multi-purpose sound quality subwoofer speaker driver. Its parameters are amenable to a variety of enclosures. At home in virtually any arrangement, boasting exceptional performance and a high-fidelity design philosophy. (6 1/2”, 8” & 10” offerings)

Unity is one of Hybrid Audio Technologies’ newest products offerings, and was designed for the discerning individual interested in a product between the Stage II Imagine and Stage IV Clarus product lines. The Unity kits include the best features of the Imagine-series components, including the same cast ABS frame, spider, and water-proof cone, with Clarus-level enhancements, including the inclusion of the Clarus C1 tweeter and incorporation of the Clarus asymmetric crossover topology for a step-up in performance.

(5 1/4” & 6 1/2” component set offerings)

Clarus joins the ranks of the winningest brand in organized sound quality competition since Hybrid Audio Technology’s inception and was reviewed by *Car Audio & Electronics Magazine* as one of the finest component sets ever tested. Many Clarus design cues were gleaned from the Stage V Legatia series, and developed with an obsessive attention to detail. Clarus offers higher grade materials, improved power handling and midbass authority, with an elevated tonal character and spectral balance over other products in Clarus’ price range and beyond.

(5 1/4” & 6 1/2” component set offerings)
